Borrowed TI-30XS: quick orientation

For the TI-30XS MultiView family. Confirm the printed model name before following these steps.

Start with six checks

☐	**Power and clear** Turn it on and clear only the current entry.
☐	**Arrow navigation** Move through entries and templates without deleting stored content.
☐	**Fraction template** Move between numerator and denominator, then press ENTER.
☐	**Exact and decimal forms** Use supported conversion only when the assignment requires it.
☐	**Negative numbers** Distinguish the negative-number key from subtraction.
☐	**Angle mode** Confirm Degree or Radian before trigonometry.

Useful topics

Fractions • powers and roots • scientific notation • trigonometry • probability • statistics • tables
