Calc for Class
Teacher printable · Revised July 2026

TI-84 Statistics Quick Guide

A concise classroom reference. Scan the QR code for the maintained online guide and interactive calculator.

Enter data	• STAT → 1:Edit. • Enter values in L1; use L2 for paired data. • To clear a list, highlight L1, press CLEAR, then ENTER.
One-variable statistics	• STAT → CALC → 1:1-Var Stats. • Select L1 and choose Calculate. • x■ is mean, Med is median, σx is population SD and Sx is sample SD.
Linear regression	• Enter x-values in L1 and y-values in L2. • STAT → CALC → LinReg(ax+b). • Store the equation in Y1 when you want it drawn with the scatterplot.
Common issue	• DIM MISMATCH usually means paired lists do not contain the same number of values.
